

# Stuart Reges

Stuart Reges  
Principal Lecturer  
Computer Science and Engineering  
University of Washington

Office: Gates Center room 305  
Phone: (206) 685-9138  
Hours: Tuesdays 1-3 pm

I manage the introductory courses (cse142 and cse143). We are experiencing record enrollments in our courses. We made a video about what is happening in our intro courses that you can [watch on youtube](#). We also got press coverage from [The Seattle Times](#), a mention of my cookie-making in [Geek Wire](#), and a follow-up story on [King5 News](#).

I teaching [CSE143](#) during winter quarter.

If you want to see some statistics about what is happening at the University of Washington, check out [this chart](#) that shows the intended majors of incoming freshmen in the College of Engineering and out [this chart](#) that also includes other majors (we have passed Biology as the second most popular major on campus). You could also check out [these charts](#) showing how the introductory courses have grown over time, partly because we have seen an increasing percentage of women.

I have authored or coauthored various papers and textbooks that people might find interesting including:

- my SIGCSE 2008 talk on [The Mystery of `b := \(b = false\)`](#)
- my SIGCSE 2006 talk on [Back to Basics in CS1 and CS2](#)
- my CS1/CS2 textook that I coauthored with Marty Stepp [Building Java Programs](#).

---
